CLASSIFICATION: The results of this bull evaluation should in no way be used as a legal document certifying or condemning fertility. Rather, it is an evaluation guide to utilize the knowledge we currently have to discourage use of potentially inefficient sires. To the best of my knowledge, the results of this evaluation indicate that the potential breeding capacity of this bull is:

☒ **Satisfactory** Satisfactory is not a guarantee; observe breeding, watch for returns to heat

☐ **Decision Deferred** About 45, 60 and 75% are expected to pass at 12, 13 and 14 mo of age, respectively. Testing at under 12 months of age is not recommended

☐ **Questionable**
☐ **Unsatisfactory**
